DESCRIPTION

The RP5 - RUNPOTEC Polyester Ø 5.5 mm is a cable pulling tool with digital meter counter. The triple-twisted special plastic tape with a diameter of 5.5 mm has an even better shearing effect than the 3 mm fiberglass rod; the frictional resistance is only half the normal value due to spot contact. The patented RG7 guiding head with swivel Ø 5.5 mm (pressed at the beginning and end of the tape) allows overcoming tight radii (bending radius 15 mm). The RP5 Ø 5.5 mm is stored in a jobsite suitable box incl. glide back protection. The unit of measurement of the metre counter can be changed from metric (m) to imperial (ft). The total breaking load of 270 kg refers to the entire pulling system. The cable pulling system is virtually breakage-free. The RP5 replacement strap cannot be stored in the box.

Optimal field of application: for pipes with a diameter of Ø 16 mm - 40 mm.

Application video: a short, very informative application video can be viewed by scanning the QR code or on www.RUNPOTEC.com.

Scope of supply: 1 x RP5 RUNPOTEC Polyester Ø 5,5 mm with digital meter counter in a plastic box, including 2 x RG7 RUNPOGLEITER with swivel (pressed on both sides)
